

7 June 2016

**KEFI Minerals plc
("KEFI" or the "Company")**

Notice of AGM and Publication of Annual Report & Accounts

KEFI Minerals (AIM: KEFI), the gold exploration and development company with projects in the Kingdom of Saudi Arabia and the Federal Democratic Republic of Ethiopia, gives notice that the Annual General Meeting ("AGM" or the "Meeting") of the Company is to be held at 11:00am BST on Thursday 30 June 2016 at The Montague on The Gardens Hotel, 15 Montague Street, London, WC1B 5BJ.

Information on the resolutions to be considered at the Meeting can be found in the Notice of AGM circular that has been made available to shareholders of the Company as an electronic communication along with forms of proxy and direction (the "AGM materials") as well as the Annual Report and Accounts for the year ended 31 December 2015 (the "Annual Report"). The AGM materials and Annual Report are available on KEFI's website at www.kefi-minerals.com.

NOTES TO EDITOR

KEFI Minerals plc

KEFI is the operator of two advanced gold development projects within the highly prospective Arabian-Nubian Shield, with an attributable 1.93Moz (100% of Tulu Kapi's 1.72Moz and 40% of Jibal Qutman's 0.73Moz) gold Mineral Resources (JORC 2012) plus significant resource growth potential. KEFI targets that production at these projects generates cash flows for further exploration and expansion as warranted, recoupment of development costs and, when appropriate, dividends to shareholders.

KEFI Minerals in Ethiopia

The Tulu Kapi gold project in Western Ethiopia is being rapidly progressed towards development, with the Mining Licence granted in April 2015.

KEFI's Definitive Feasibility Study was then completed and the Company is now refining contractual terms for project construction and operation. Latest estimates for annual gold production are c. 100,000oz pa for a 10-year period and All-in Sustaining Costs (including operating, sustaining capital and closure) of approximately US\$724/oz to US\$752/oz at a gold price range of US\$1,000/oz to US\$1,400/oz. Tulu Kapi's Ore Reserve estimate totals 15.4Mt at 2.12g/t gold, containing 1.05Moz. The eight core production years of the open pit are estimated to yield an average of 115,000oz pa.

All aspects of the Tulu Kapi (open pit) gold project have been reported in compliance with the JORC Code (2012) and subjected to reviews by appropriate independent experts. These plans now also reflect the agreed construction and operating terms with project contractors, and have been independently reviewed by experts appointed for the project finance syndicate.

A Preliminary Economic Assessment has been published that indicates the economic attractiveness of mining the underground deposit adjacent to the Tulu Kapi open pit, after the start-up of the open pit and after positive cash flows have begun to repay project debts.

At a gold price of US\$1,250/oz, the projected cash flows indicate a cash build-up in the first three production years of US\$173 million, which would be sufficient to repay all project debts, fund the development of the underground mine and commence paying dividends to shareholders.

KEFI Minerals in the Kingdom of Saudi Arabia

In 2009, KEFI formed G&M in Saudi Arabia with local Saudi partner, Abdul Rahman Saad Al-Rashid & Sons Company Limited ("ARTAR"), to explore for gold and associated metals in the Arabian-Nubian Shield. KEFI has a 40% interest in G&M and is the operating partner. To date, G&M has conducted preliminary regional reconnaissance and has had five exploration licences ("ELs") granted, including Jibal Qutman and the more recently granted Hawiah EL that contains over 6km strike length of outcropping gossans developed on altered and mineralised rocks with all the hallmarks of a copper-gold-zinc VHMS deposit.

At Jibal Qutman, G&M's flagship project, Mineral Resources are estimated to total 28.4Mt at 0.80g/t gold for 733,045 contained ounces. The shallow oxide portion of this resource is being evaluated as a low capital expenditure heap-leach mine development.

ARTAR, on behalf of G&M, holds 23 EL applications that cover an area of approximately 1,303km². ELs are renewable for up to three years and bestow the exclusive right to explore and to obtain a 30-year exploitation (mining) lease within the area.

The Kingdom of Saudi Arabia has instituted policies to encourage minerals exploration and development, and KEFI Minerals supports this priority by serving as the technical partner within G&M. ARTAR also serves this government policy as the major partner in G&M, which is one of the early movers in the modern resurgence of the Kingdom's minerals sector.
