Developing a +100,000oz p.a. Gold Producer Then Expanding in the Arabian-Nubian Shield

ANNUAL GENERAL MEETING
30 JUNE 2016
The information contained in this document ("Presentation") has been prepared by KEFI Minerals plc (the "Company"). While the information contained herein has been prepared in good faith, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers give, have given or have authority to give, any representations or warranties (express or implied) as to, or in relation to, the accuracy, reliability or completeness of the information in this Presentation, or any revision thereof, or of any other written or oral information made or to be made available to any interested party or its advisers (all such information being referred to as "Information") and liability therefore is expressly disclaimed. Accordingly, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers take any responsibility for, or will accept any liability whether direct or indirect, express or implied, contractual, tortious, statutory or otherwise, in respect of, the accuracy or completeness of the Information or for any of the opinions contained herein or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this Presentation.

This Presentation may contain forward-looking statements that involve substantial risks and uncertainties, and actual results and developments may differ materially from those expressed or implied by these statements. These forward-looking statements are statements regarding the Company's intentions, beliefs or current expectations concerning, among other things, the Company's results of operations, financial condition, prospects, growth, strategies and the industry in which the Company operates. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These forward-looking statements speak only as of the date of this Presentation and the Company does not undertake any obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date of this Presentation.

This Presentation should not be considered as the giving of investment advice by the Company or any of its shareholders, directors, officers, agents, employees or advisers. Each party to whom this Presentation is made available must make its own independent assessment of the Company after making such investigations and taking such advice as may be deemed necessary.

Neither this Presentation nor any copy of it may be (a) taken or transmitted into Australia, Canada, Japan, the Republic of Ireland, the Republic of South Africa or the United States of America (each a “Restricted Territory”), their territories or possessions; (b) distributed to any U.S. person (as defined in Regulation S under the United States Securities Act of 1933 (as amended)) or (c) distributed to any individual outside a Restricted Territory who is a resident thereof in any such case for the purpose of offer for sale or solicitation or invitation to buy or subscribe any securities or in the context where its distribution may be construed as such offer, solicitation or invitation, in any such case except in compliance with any applicable exemption. The distribution of this document in or to persons subject to other jurisdictions may be restricted by law and persons into whose possession this document comes should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of the relevant jurisdiction.
Why Start KEFI’s Production in Ethiopia?

- Government actively boosting mining sector
- Thriving economy, over 10 years of 7-10% GDP growth
- HQ for African Union and stable
- High growth country with pro-development culture
- Prospective country with limited modern exploration
- Rapidly improving infrastructure and cheap electricity
2013: KEFI acquired 75% for US$10/ounce of Ore Reserves
• Previous owners had spent >US$50 million on drilling and studies
• Development plan required capex of US$289 million

2014: KEFI acquired the remaining 25% of Tulu Kapi
• KEFI transformed flexibility for mine planning by increasing Indicated Resource from 1.1Moz to 1.6Moz
• Better orebody definition and control increased Ore Reserve grade from 1.8g/t to 2.1g/t (2.5g/t for 1st 8 years of mining)

2015: KEFI assembled the project team and finance syndicate
• Mining Agreement signed with Gov’t and Permits granted
• Completed revised Tulu Kapi DFS – required funding halved and unit costs reduced from AISC >US$1,000/oz to <US$800/oz

2016: Trigger development, with lower risk & higher returns
KEFI owns 95% of KEFI Minerals Ethiopia. Government 5% to increase to c. 25-30% with planned equity investment in KME

**Project Financials @ US$1,250/oz**

**Targeted Sources of US$130M Development Funding Required**

- **Project level equity, $20M**
- **Mezz/Equity, $15M**
- **COF, $10M**
- **Senior secured debt, $85M**

**Mezz/Equity** = mix of mezzanine facilities and equity from project contractors or offtake parties

**COF** = Cost Overrun Facility

Syndicate structure being formalised
KEFI’s market capitalisation does not reflect the quality of Tulu Kapi

Tulu Kapi is a low capital intensity mine development

Sourced from company public reports with data to 23 June 2016. Initial capex to develop New Luika is per Shanta Gold’s 2015 plan to further develop the project.
Wayne Nicoletto  
**KEFI Minerals Ethiopia Managing Director, and Group Head of Operations**  
30 years as a metallurgist, general manager and country head. Specialised in design, start-up and operation of gold mines in Africa, Central Asia and Australia over the past 15 years, primarily heading up operations in gold mines in Africa and Mongolia.

Simon Cleghorn  
**Resources Manager**  

Guy Ware  
**Project Manager, Plant Contracting Co-ordinator**  
Civil Engineer (BEng) and Project Implementation Manager. Planning and delivery of process facilities within the global resources industry, focused on gold and base metals projects in Australia and Africa.

Kebede Belete  
**Country Manager Ethiopia**  
Geologist (PhD, Austria; MPhil, UK; BSc, Ethiopia). Over 25 years of experience as Exploration Manager and Country Manager for Ethiopian Ministry of Mines, Golden Prospect Mining Company LTD (UK), Minerva Resources LTD (UK) and Nyota Mineral (UK).

Sergio di Giovanni  
**Metallurgist & Dev. Manager, Value-Engineering**  
(BSc. Murdoch, Perth, MAUSIMM). Over 23 years’ experience in operations in Australia, Asia, Europe, Mid-East and Americas. He has expertise in CIL, heap leach and flotation plants for gold, base metals & iron ore mines.

Geoff Davidson  
**Mining Engineer, Mine Contracting Co-ordinator**  
Mining engineer with 25 years’ experience in surface and underground mining, many years as Principal Consultant for a variety of major mining consultancies. Geoff is a Fellow member of the AusIMM.
Tulu Kapi Project Timetable
Sequence of Financial Commitments

Commitment Flow Chart

Monthly Commitment

Cumulative Commitment
• Construction start Q4-16 requires timetable performance of Finance Syndication and Community Resettlement

• Finance Syndication: KEFI doing all required for full document preparation Q3-16 and drawdown Q4-16

• Community Resettlement: KEFI doing all required for the first phase of the community resettlement Q3-16

• Commissioning to start Q4-17
• Focus on areas needed for construction
  o Immediate focus on Phase 1B and Mine Camp

• High-level government intervention on any policy matters
  o Directives to ensure compensation based on National statistics for yield, productivity and price

• Local government engagement on detailed actions
  o Create a formal platform to work constructively with local government

• Coordinate relocation activities
  o Align households activities => household graves, socio-economic data, financial training and bank accounts
  o Accelerate resettlement infrastructure development

• Promote positive engagement
  o Open communication strategy
  o Resolve legacy issues (exploration compensation)
  o Initiate local employment and business opportunities
• Completed and ready for sign-off in syndication documentation:
  o Organisation structure, role definitions, recruitment plan
  o Delegations of authority
  o Employee contracts
  o Employee handbooks

• To be prepared with contractors Lycopodium and African Mining Services:
  o OH&S system
  o Training system

• Recruitment Status:
  o Owner’s Engineering and Control Team in Place
  o Construction management in place
  o EPC Contractor in place
  o Mining Contractor in place
  o Operations team next to be triggered:
    • Finance/Administration Team being expanded now
    • Operations Manager on standby, then Plant and Mine Manager
Tulu Kapi

Exploration Potential below Open Pit

Resource blocks:
- >1.5g/t Au (brown)
- >5g/t Au (purple)

Open Cut:
- 1.05 Moz at 2.12 g/t Probable Reserves
- 1.72 Moz at 2.65 g/t Total Resource

Potential underground:

Ultimate open pit outline

Underground potential of c. 1 Moz: Resource of 330,000 oz at 6.3 g/t. Plus deeper exploration target

Source: KEFI Minerals

Final diamond hole drilled to the north of open pit intersected 90 m at 3 g/t Au
Resource remains open along strike, down plunge and at depth
• Thick, high-grade gold zones below open pit
• Underground mineable resource = 1.3Mt @ 5.2g/t
• Preliminary studies based on current resource only show:
  • Open Pit + Underground production ≈ 150,000oz p.a.
  • Additional NPV (8%) ≈ US$44M (at US$1,250/oz)
  • Plus potential to triple current underground ounces

Combined NPV (8%) of OP+UG gold production >US$200M

Note: The above profile is indicative and based on preliminary studies only.
- Gold grades increase and ore lenses thicken with depth
- Resource remains open along strike, down plunge and at depth
- High-grade drill intercepts below the planned open pit include:

Ethiopia
Regional Exploration
Arabian Nubian Shield: recognised as one of the most promising mineral districts for large gold and base metal discoveries

Ethiopia has one single large-scale gold mine which is closing soon: **Lege Dembi** (Midroc Gold) **100Koz pa**

Apart from Tulu Kapi, large deposits include:

- **Dish Mountain** (ASCOM) **1.7Moz at 1.5g/t Au**
- **Fiti** (Midroc gold) **Skarn style copper-gold**

Gold explorers recently entering Ethiopia include: **Newmont, Goldfields, Centamin**

**Tulu Kapi is the first modern development**

**KEFI has opportunity to establish a leadership role**
Ethiopia

Propects near Tulu Kapi

Guji: Visible gold in drill Core

Komto: Primary gold mineralisation

Source: KEFI Minerals
Jibal Qutman
- 0.7Moz gold resource defined at Jibal Qutman
- Evaluating low-cost, heap-leach treatment of oxide ore
- Low capex & quick start-up
- Mining Licence Application being discussed with regulators
- Target that Jibal Qutman cash flows fund exploration of Saudi Arabian portfolio of targets

Hawiah
- Potential for very large Cu-Au-Zn orebody
- Gossan horizon extends 6km
- Trenching indicates gold enriched near surface
- Geophysics indicates large metal-bearing body below gossan
- Establishing stakeholder relationships prior to drilling

Large Portfolio of Exploration Licence Applications
- 23 Exploration Licences under application (1,303km²); all with ancient workings
- Joint venture with leading family conglomerate and minerals sector now a Govt priority
• c.99km² EL was granted in July 2012
• Rapidly delineated initial JORC Resource in 2013
• Resource increased to 0.73Moz in 2015
• Four ELAs around Jibal Qutman EL with satellite open pit targets

• Delineating further shallow oxide gold but now sufficient to start Mining Licence process and completion of full feasibility study
• Mining Licence Application being discussed with regulators for planned Heap Leach operation to fund exploration of portfolio
• New c. 95km² Hawiah EL granted in Dec 2015

• Potential for very large Cu-Au-Zn VHMS orebodies

• Hosted in **+120km north-south trending Wadi Bidah Mineral district** which hosts some large VHMS deposits

• Analogs include Jabil Sayid (Barrick) and Bisha (Nevsun)

• **Gold-bearing gossans** at surface based on trench results

• Geophysical survey results indicate large buried metal-bearing structures

• Trench results, Landsat-7 imagery analysis and geophysical survey results define shallow and deep drill targets

• Finalising community compensation agreement before drilling

Source: KEFI Minerals
**Tulu Kapi, Ethiopia**

**H2-2016:**
- Financial completion of Project Finance
- Implement community resettlement
- Start construction

**2017:**
- Complete construction, commission production
- Start testing satellite gold deposits

**Jibal Qutman and Hawiah, Saudi Arabia**

**H2-2016:**
- Jibal Qutman – submit Mining Licence Application and commence prospecting adjacent licences
- Hawiah – start testing large Cu-Au-Zn target

**2017:**
- Trigger Jibal Qutman feasibility studies for development to follow start-up at Tulu Kapi
