KEFI MINERALS

Developing a 100,000+ oz pa gold operation within the Arabian-Nubian Shield

December 2016
The information contained in this document ("Presentation") has been prepared by KEFI Minerals plc (the "Company"). While the information contained herein has been prepared in good faith, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers give, have given or have authority to give, any representations or warranties (express or implied) as to, or in relation to, the accuracy, reliability or completeness of the information in this Presentation, or any revision thereof, or of any other written or oral information made or to be made available to any interested party or its advisers (all such information being referred to as "Information") and liability therefore is expressly disclaimed. Accordingly, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers take any responsibility for, or will accept any liability whether direct or indirect, express or implied, contractual, tortious, statutory or otherwise, in respect of, the accuracy or completeness of the Information or for any of the opinions contained herein or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this Presentation.

This Presentation may contain forward-looking statements that involve substantial risks and uncertainties, and actual results and developments may differ materially from those expressed or implied by these statements. These forward-looking statements are statements regarding the Company's intentions, beliefs or current expectations concerning, among other things, the Company's results of operations, financial condition, prospects, growth, strategies and the industry in which the Company operates. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These forward-looking statements speak only as of the date of this Presentation and the Company does not undertake any obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date of this Presentation.

This Presentation should not be considered as the giving of investment advice by the Company or any of its shareholders, directors, officers, agents, employees or advisers. Each party to whom this Presentation is made available must make its own independent assessment of the Company after making such investigations and taking such advice as may be deemed necessary.

Neither this Presentation nor any copy of it may be (a) taken or transmitted into Canada, Japan, the Republic of Ireland, the Republic of South Africa or the United States of America (each a “Restricted Territory”), their territories or possessions; (b) distributed to any U.S. person (as defined in Regulation S under the United States Securities Act of 1933 (as amended)) or (c) distributed to any individual outside a Restricted Territory who is a resident thereof in any such case for the purpose of offer for sale or solicitation or invitation to buy or subscribe any securities or in the context where its distribution may be construed as such offer, solicitation or invitation, in any such case except in compliance with any applicable exemption. The distribution of this document in or to persons subject to other jurisdictions may be restricted by law and persons into whose possession this document comes should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of the relevant jurisdiction.

Summary

- KEFI Minerals is an exploration and development company focused on gold and copper assets, within the highly prospective Arabian-Nubian Shield.
- Progressing development of flagship Tulu Kapi gold project in Ethiopia following revised DFS and full permitting in 2015 and selection contractors 2016.
- KEFI share price has dropped to 12 month low in past two months (halving) following Ethiopian declaration State of Emergency 8 October 2016.
- Progress continues underpinned by strong support from Government, development bank and contractors.
- Targeting to commence construction in 2017 and have first full year production 2019.
- Evaluating underground mine at Tulu Kapi and low-cost, heap-leach treatment of oxide ore at Jibal Qutman project in Saudi Arabia.

1) Data correct as of 9 December 2016
Recent Actions by Government:

- Since 2005 National Elections Ethiopia has continued to have a year on year growth rate above 9%
- October 2016: Social unrest triggered declaration of 6-month State of Emergency
- November 2016: Govt triggered program to effect change, starting with new Federal and Regional Cabinets
- KEFI’s perspective and prognosis:
  - There have been no major public safety incidents reported since 8 October and KEFI’s activities have remained normal
  - Mining elevated as a priority. Committees formed to fast-track by both Prime Minister and now also by Regional President
  - Government has started lifting restrictions of the State of Emergency and announced its possible early end

KEFI’s Status for Government:

- Tulu Kapi is a development-ready new mining project. $50 million invested to date. $150-160 million to go. Fully permitted.
- Gov’t has a 5% free-carry, a 7% royalty, committed a $20 million project contribution to increase its project-level equity interest
- The Development Bank of Ethiopia has confirmed intent to participate in the project debt
- State of Emergency interrupted progress with some project financiers but KEFI has switched focus to those who remain keen
Ethiopia - A country on the rise

1) IMF World Economic Outlook April 2016

- 15 years of 7-10% GDP growth, with a pro-development culture, Africa’s fastest growing economy (2015 - 10.2% Real GDP growth)

- Second most populous country in sub-Saharan Africa, ~100m people

- Government is committed to achieving economic development through the Growth and Transformation Plan (GTP)

- Rapidly improving infrastructure and cheap electricity

- Ranks ahead of Kenya, Mali, Mozambique and South Africa for Mining Investment Attractiveness per Fraser Institute published 2016

- HQ for African Union, provides UN peacekeepers for region

Ethiopia is open for business

1) IMF World Economic Outlook April 2016
Capital structure (fully-diluted)

KEFI Minerals plc

- Odey AM: 25%
- Ausdrill/Lyco: 14%
- Board: 5%
- Public: 56%

- Al Rashid: 60%
  - KSA JV: 40%
  - Jibal Qutman, Hawiah and other: 70-80%

- Ethiopia Govt.: 20-30%
  - Ethiopia JV: 70-80%
  - Tulu Kapi and others: 20-30%
Reduced project capital requirements though optimisation and contracting. Added Financing charges and Other KEFI Activities:
- Latest estimate of total KEFI Group funding requirement $150-160M (about half that of previous owner)

Assembling project funding syndicate including Government Equity, Development Bank Loans and Mining Finance Specialists
- Equity requirement for KEFI is targeted at c. $20M, after taking all components into account, including mezzanine

Assembling project funding proposals from alternative sources which may avoid any additional equity contribution by KEFI:
- Invited proposals from Corporates at project and parent level to provide alternatives to dilution at current share price
Revitalised gold development story: Since assuming control of the Tulu Kapi project in Ethiopia (2014), the team has overhauled the geological database and its interpretation, optimised the mine plan, consequently improving economics.

Overhauled DFS and subsequently optimised with contractors: Now a financially robust project, producing an average of 115Koz pa over the first 8yrs, with 20% of resources outside current mine plan.

Project (100%) has an NPV$_8$ of $100m at $1,200/oz and IRR > 47%.

Development ready: Mining licence is in place and KEFI has signed bilateral agreement with the Government of Ethiopia, selected mining and construction contractors, and completed Independent Technical Reviews on behalf of potential lenders.

Experienced management team: KEFI team has collectively financed and constructed six mines across Africa and Asia-Pacific, including Perseus’ Edikan in Ghana and Crew Gold’s SMD in Guinea. Team has 10 years in-country experience.

Under-valued: Compared to peer group of African gold developers, KEFI is significantly under-valued by the market, providing opportunity for a significant value uplift for investors.

Upside potential: Tulu Kapi deposit is open at depth and preliminary studies indicate the potential to extend mine life through an underground development.
Tulu Kapi is in the world renowned Arabian-Nubian Shield within Ethiopia

- ~360km west of the capital city of Addis Ababa
- A main road to Addis Ababa is within 12km of site
- Mains power is within 50km

KEFI currently holds 100% of the project, with the Ethiopian government entitled to 5% free carried interest

- Government confirmed equity investment of $20m to increase total to up to 30% (with the interest reducing back towards 20% depending on KEFI contributions)

Probable Ore Reserves: 15.4 Tonnes (Mt) 2.12 Grade (g/t Au) 1,050 Cont. Au (Koz)

Indicated Resources: 18.8 Tonnes (Mt) 2.67 Grade (g/t Au) 1,620 Cont. Au (Koz)

Inferred Resources: 1.4 Tonnes (Mt) 2.40 Grade (g/t Au) 100 Cont. Au (Koz)

Full mining licence until 12 April 2035, renewable for a 10-year period
Tulu Kapi

A financially robust project

**The operation is strong financially**

- At the 6 year gold price low of $1,050/oz, and $20m additional KEFI equity:
  - After Tax IRR is 14%
  - Total unit cost is $976/oz, including operating, taxes, financing and capex
- Underpinned by:
  - low strip ratio of 7.5:1; and
  - simple metallurgy (recovery 93%+)

...and is relatively low risk

- Straight forward open pit operation similar to others operated by selected contractor Ausdrill/AMS
- Simple process flow sheet similar to many built by selected EPC contractor Lycopodium
- Strong government and development bank interest in the project adding heightened security

Cost competitive in terms of both **capital intensity** and **All-In Sustaining Costs**, when compared to African peers.
8th best jurisdiction in Africa for mining investment by the 2015 Fraser Institute survey, ahead of Zambia and South Africa

Highly prospective - limited modern exploration:

- Only existing commercial mine is Lege Dembi (~130Koz pa), operated by Midroc
- Ascom Precious Metals is undertaking a PFS on the 1.7Moz Dish Mountain project

Strong support and investment from Ethiopian Government - actively boosting mining sector in order to achieve GDP growth

Large companies beginning to enter e.g. Israeli Chemicals Limited acquisition of Allana Potash for $110m, and Newmont has started exploration

**KEFI is well positioned to be a leader in an emerging gold province**
Local community briefing at Tulu Kapi
APPENDICES
The underground provides strong upside

- Thick, high-grade gold zones below open pit
- Underground mineable resource = 1.3Mt @ 5.2g/t
- Preliminary studies based on current resource only show:
  - Open Pit + Underground production ≈ 150,000oz pa
  - Additional NPV$_{8\%}$ ≈ $23M (at $1,200/oz)
  - Mineable resource outside open pit is 1.3Mt @ 5.2g/t Au containing 220Koz
  - Gold mineralisation open at depth, along strike and down plunge
  - Gold grades increase and ore lenses thicken with depth
  - Resource remains open along strike, down plunge and at depth

Potential production profile (Koz Au)$^1$

Potential underground resource$^2$

---

1) The profile is indicative and based on preliminary studies only
2) Resource blocks below open pit: >1.5g/t Au (brown) >5g/t Au (pink)
Guji: Visible gold in drill Core

Komto: Primary gold mineralisation

Mine design and scheduling at Tulu Kapi has been developed over three stages in order to maximise cash flows over the initial three years (Stage 1).

- This will facilitate rapid repayment of debt, allowing the company to pay dividends sooner.
- This operational cash flow will provide the company the option to expedite the underground development, delivering upside for shareholders.
Harry Anagnostaras-Adams – Executive Chairman – MBA (Australian Graduate School of Business)
Harry was founder or co-founder of Citicorp Capital Investors Australia, investment company Pilatus Capital, Australian Gold Council, EMED Mining, KEF Minerals and Cyprus-based Semarang Enterprises. He has overseen a number of start-ups in those and their related organisations principally through the roles of Chairman, Deputy Chairman or Managing Director. He qualified as a Chartered Accountant while working with PricewaterhouseCoopers.

John Leach – Finance Director – BA Economics, MBA, MICA (Aust & Canada)
John has over 25 years’ experience in senior executive positions in the mining industry internationally and is currently also a non-executive director of Australian-listed Pancontinental Oil and Gas NL. He is a Member of the Institute of Chartered Accountants (Australia), a Member of the Canadian Institute of Chartered Accountants, and is a Fellow of the Australian Institute of Directors.

Mark Wellesley-Wood, Non-Executive, Chair Technical Review Committee – BEng (Mining)
Mark is a mining engineer, with over 40 years’ experience in both the mining industry and investment banking. He has been closely involved in mining activities in Africa, having started his career on the Zambian copper-belt. Mark is a former Executive Chairman and CEO of South African gold miner, DRDGold Limited, and a former director of Investec Investment Banking and Securities in London. He is currently Chairman of AIM quoted Tri-Star Resources plc.

Norman Ling, Non-Executive, Chair Nominations Review Committee – BA German and Economic History [Hons]
Norman was a member of the British diplomatic service for more than 30 years, for the last ten with the rank of ambassador. He has served in a wide range of countries in the Middle East and Africa. His last post, before retirement, was as Ambassador to Ethiopia, Djibouti and the African Union. For the last two years he has been actively involved with development of the mining industry in Ethiopia.

Ian Plimer – Non-Executive, Chair Exploration Review Committee – BSc Mining (UNSW) [Hons], PhD, FTSE, FGS, FAIMM
Ian is Emeritus Professor at The University of Melbourne where he was Professor and Head of the School of Earth Sciences (1991-2005). He was Professor of Geology (University of Newcastle 1985-1991) and Professor of Mining Geology (University of Adelaide 2005-2012). He serves on the Boards of Silver City Minerals Ltd and Niuminco Group Ltd and unlisted-companies Hancock Prospecting, TNT Mines Ltd and Perth Resources Ltd. He represents Hancock Prospecting on the Lakes Oil N.L. Board.
Tulu Kapi
Development team

Wayne Nicoletto, Chief Operating Officer and Managing Director, KEFI Ethiopia – BSc Metallurgy, Grad Dip Mining (WASM)
Wayne has 30 years’ experience in the mining industry as a Metallurgist and a General Manager, specialising in start-up and operation of gold mines in Africa, Central Asia and Australia. Over the past 15 years, he has been primarily heading up operations in gold mines in Africa, including General Manager and Country Head of the Edikan Mine in Ghana and SMD in Guinea as well as Vice President of Operations of Boroo Gold Mine in Mongolia.

Kebede Belete – Country Manager Ethiopia – BSc (Geology), PhD, Mphil
Dr. Kebede Belete is a geologist with more than 25 years of experience. He has worked on exploration projects for the Ethiopian Ministry of Mines, Golden Prospect Mining Company, Minerva Resources and Nyota Minerals in roles including being Exploration Manager and Country Manager. Kebede has been involved with the Tulu Kapi gold project for more than 10 years.

Guy Ware - Project Manager, Plant Contracting Co-ordinator – BEng Civil and Construction (WASM)
Guy has undertaken planning and delivery of process facilities throughout the resources industry, focussing on gold and base metals projects in Australia and Africa. With considerable experience with world minerals processing leader Lycopodium, Guy has also been a project manager for GJ Engineering and Increva.

Simon Cleghorn – Resource Manager – BEng Mining Geology [Hons] (WASM), MAusIMM
Simon is a geologist with 24 years’ experience in mining geology and project development with emphasis on resource and reserve estimation in primarily gold and base metals mines. His experience has been with international projects in Armenia, Georgia, Russia, South East Asia and project review in Europe and South America as well as Australia. He has been responsible for production geology management, due diligence project review and management of mining studies and project upgrades as well as resource and reserve.

Sergio di Giovanni – Metallurgist & Dev. Manager, Value-Engineering – BSc Metallurgy (Murdoch), MAusIMM
Over 23 years’ experience in operations in Australia, Asia, Europe, Mid-East and Americas. He has expertise in CIL, heap leach and flotation plants for gold, base metals and iron ore mines.

Geoff Davidson – Mining Engineer, Mine Contracting Co-ordinator – BEng Mining (WASM), FAusIMM
Geoff has over 25 years’ experience in surface and underground mining with many years as Principal Consultant for a variety of major mining consultancies. Geoff has also had significant tenures with Snowden, Brandrill and Mining and Cost Engineering.
