The information contained in this confidential document (“Presentation”) has been prepared by KEFI Minerals plc (the “Company”). While the information contained herein has been prepared in good faith, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers give, have given or have authority to give, any representations or warranties (express or implied) as to, or in relation to, the accuracy, reliability or completeness of the information in this Presentation, or any revision thereof, or of any other written or oral information made or to be made available to any interested party or its advisers (all such information being referred to as “Information”) and liability therefore is expressly disclaimed. Accordingly, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers take any responsibility for, or will accept any liability whether direct or indirect, express or implied, contractual, tortious, statutory or otherwise, in respect of, the accuracy or completeness of the Information or for any of the opinions contained herein or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this Presentation.

This Presentation may contain forward-looking statements that involve substantial risks and uncertainties, and actual results and developments may differ materially from those expressed or implied by these statements. These forward-looking statements are statements regarding the Company’s intentions, beliefs or current expectations concerning, among other things, the Company’s results of operations, financial condition, prospects, growth, strategies and the industry in which the Company operates. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These forward-looking statements speak only as of the date of this Presentation and the Company does not undertake any obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date of this Presentation.

This Presentation should not be considered as the giving of investment advice by the Company or any of its shareholders, directors, officers, agents, employees or advisers. Each party to whom this Presentation is made available must make its own independent assessment of the Company after making such investigations and taking such advice as may be deemed necessary.

Neither this Presentation nor any copy of it may be (a) taken or transmitted into Australia, Canada, Japan, the Republic of Ireland, the Republic of South Africa or the United States of America (each a “Restricted Territory”), their territories or possessions; (b) distributed to any U.S. person (as defined in Regulation S under the United States Securities Act of 1933 (as amended)) or (c) distributed to any individual outside a Restricted Territory who is a resident thereof in any such case for the purpose of offer for sale or solicitation or invitation to buy or subscribe any securities or in the context where its distribution may be construed as such offer, solicitation or invitation, in any such case except in compliance with any applicable exemption. The distribution of this document in or to persons subject to other jurisdictions may be restricted by law and persons into whose possession this document comes should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of the relevant jurisdiction.
• The Arabian-Nubian Shield (ANS) is similar to the Precambrian shields of Australia and Canada, but under-explored

• KEFI is focussed on ANS, specifically Democratic Republic of Ethiopia (Ethiopia) & Kingdom of Saudi Arabia (KSA)

• Experienced management and technical team with clear development strategy

• Transformational acquisition completed in Dec 2013

• Potential to be in production by 2016 and producing approximately 80Koz per year of gold by 2017

• Peer comparative statistics rate KEFI highly
Ethiopia Highlights
- KEFI acquired 75% of Tulu Kapi for £4.5m (Dec 2013)
- Entered into agreement to acquire remaining 25% of Tulu Kapi for £1.5m (Jun 2014)
- $50m historic expenditure at Tulu Kapi
- Acquisition cost of <$5/oz of gold resources (JORC certified)
- JORC compliant Mineral Resource of **2.05Moz Au (Mar 2014)**, 90% classified as Indicated Resource
- Further upgraded resource due Q3 2014
- Revised DFS to be completed in Q4 2014

Saudi Arabia Highlights
- KEFI formed Gold and Minerals Ltd (G&M) with strategic Saudi group ARTAR (May 2009)
- 2 Exploration Licences (ELs) are held
- 26 ELs are under application covering ≈1,600km²
- JORC compliant Mineral Resource for Jibal Qutman increased to 0.5Moz Au (Feb 2014)
- PFS at Jibal Qutman completed (Mar 2014)
- Mining Licence Application was submitted to ARTAR for internal review (Mar 2014)
- Potential to be in production by 2016 and **producing approximately 80Koz Au pa by 2017**
Since acquiring 75% of Tulu Kapi in December, KEFI has:

- Formalised three-year payment agreement with Govt on inherited VAT liability
- Increased Indicated Resource by +60% to 1.9Moz
- Refined selective mining strategy to increase gold production and grade
- Triggered trenching, drilling, engineering for revised DFS and Mining Licence Application by end of 2014
- Negotiated the acquisition of the residual 25% of Tulu Kapi
- Announced updated Mine Plan targeting 1.2Moz from initial open pit (compared with 0.8Moz at time of acquisition)

At Jibal Qutman in Saudi Arabia, KEFI has:

- Increased resources and continuing to drill extensions
- Completed the PFS and now focused on obtaining Mining Licence, which is expected in H2 2014
The indexing shows that the KEFI share price, since Admission to AIM, sits in line with the indices. The red line shows that KEFI shares have now leapt in terms of gold resource backing.

EMERGING GOLD PRODUCER
IN THE ARABIAN-NUBIAN SHIELD

KEFI in Ethiopia
Tulu Kapi Gold Project
• **Fastest** growing non-energy economy in Africa, 2\textsuperscript{nd} largest population in Africa (+80M)

• **Dynamic economy:** GDP grew by 8.5% over the past 5 years, and over 7.1% in 2013. Main economic partners: China, Germany, Saudi Arabia, USA, Belgium. Ethiopia’s land footprint is greater than Spain and France combined

• **Diverse mineral resource endowment:** Currently 136 companies working on 246 licences. Newmont and Gold Fields recently commenced Au exploration in Ethiopia

• **Government actively boosting mining sector:** Corporate tax for mining sector reduced to 25%, royalty on Au production reduced to 7%, legislative incentives to mining companies include security of tenure; exemption from customs duty and taxes on mining equipment; for mining sector companies accelerated depreciation on pre-production and capex over 4 years

• **Gold is main mineral export:** Gold exports increased to $602m in 2013 from $5m in 2001

• **Lege Dembi - the largest Au mine in Ethiopia:** 135,000oz pa production, reserve 1.98Moz Au
Revised development strategy includes:

- Selective mining of the orebody to:
  - Reduce pit size and associated waste:ore ratio
  - Increase Head Grade from 1.8g/t to c. 2.3 g/t Au
- Reduce original 2Mtpa plant to ≈1.2Mtpa, targeting halving of capex from $289m to ≈$143m
- Reduce All-in Costs by mining fewer tonnes at a higher grade and reducing waste, capex and closure costs
- Upgraded DFS will be completed by end-2014

*May 2014 - KEFI announced revised estimates indicating variability of +/-15% around preliminary Dec 13 estimates and that production is likely to be higher than initially expected*
An infill RC drill programme of 20 holes is in progress, to confirm higher grade mineralisation within the revised open-pit reserve. Current mine planning indicates 80-85,000 oz pa production over 10+ years.

Further potential lies beneath the planned open pit with high-grade intercepts that are encouraging for future underground development. Plus potential for pit cut-back under gold price scenarios > $1,200/oz.
• Mar 2014: resource totaling 2,051,000oz Au (24.1Mt at 2.64g/t Au)
• This estimate increased ounces in the Indicated category by 65%
• 91% of the total resource now in the Indicated category

• This resource includes data from 71 holes drilled in late 2012 that missed the cut-off for the resource estimate included in the Nyota DFS published in Dec 2012
• Targeted open pit mine production increased to 1.2Moz, compared with KEFI's pre-acquisition December 2013 estimate of 0.8Moz
• All-in costs still estimated at circa $700/oz (includes all capex, opex and closure)
• These interim conclusions indicate improved returns
• KEFI is now refining project parameters ahead of the revised DFS due at year end
TULU KAPI: UPDATED RESOURCES GIVE HIGHER CONFIDENCE

2014
EMERGING GOLD PRODUCER
IN THE ARABIAN-NUBIAN SHIELD

KEFI in Kingdom of Saudi Arabia
Jibal Qutman Gold Project (40% KEFI)
• Saudi Arabia is looking to expand and develop its mineral sector, diversifying the country’s revenues away from oil by implementing new mining code.

• Saudi Arabia is largely unexplored with few companies exploring for gold.

• Few western mining companies operating in the country; includes Barrick Gold, which owns the Jabal Sayid Mine. Once in production, annual production expected at 100-130 m lbs of Cu.

• Exploration and development costs are low by industry standards.

• Saudi Industrial Development Fund provides loans for up to 75% of the capital cost of mine development at nominal interest rates.

• Overall economic effect of increased activity in mining industry could significantly help ongoing unemployment challenges in KSA.
• G&M (KEFI 40%, ARTAR 60%) – Strategic Saudi partner, Abdul Rahman Saad Al Rashid and Sons (ARTAR) - a major local group that provides administrative, logistical, financial support

• G&M has a sizeable proprietary database for selective targeting in the ANS (containing historic workings, geology, geophysics, remote sensing, prospect geology, alteration and structure)

• 2 existing Exploration Licences (Jibal Qutman, Selib North)

• 0.5 Moz JORC resource defined at Jibal Qutman within 18 months of licence grant

• 26 Exploration Licences under application (1,600 km²) some with the potential for award in 2014

• All ELs and EL Applications have ancient Au and/or Cu workings
Mineralisation identified in five areas: Main Zone, South Zone, West Zone, 3K Hill and 4K Hill

Hosted in the +300km north-south trending Nabitah-Tathlith fault zone. Another area under evaluation is 5K Hill

The EL was granted in July 2012 and is approx 99km$^2$ in area
KEFI published a Jibal Qutman resource totalling 495,194 oz Au (16.7Mt at 0.92g/t Au) in March 2014:

Pre-feasibility Study for Jibal Qutman completed in March 2014 for review with partner and regulators
• **Mining** – Pit shell designs reviewed by AMC Consultants

• **Processing** – Process flow diagrams and design criteria performed with in-house expertise

• **Engineering Design** – Consultant HDO completed plant layout, major equipment list and bill of quantities. Currently reviewing to reduce estimated capex

• **Environmental** – MDS environmental consultants reviewed environmental study for inclusion in PFS

• **Hydrology** – Large diameter water well completed. Pumping test completed and hydrology report completed

• **Metallurgy** – Tests currently being performed will be sufficient to confirm plant design for PFS level study
• Potential to be in production by 2016 and producing approx. 80Koz Au pa by 2017
• Emerging leader in the Arabian-Nubian Shield, comparable to the shields of Australia and Canada which host most of their gold production, but under-explored
• Preserve All-in Costs at Tulu Kapi at $700/oz +/-15%, significantly below global averages
• Experienced management team for discovery, development and financing
• Finance plan targets ≈10% of capex to be equity funded. Projected robust cash flow for payback, returns on equity invested, organic growth and dividends
• Expected milestones during H2 14 to include completion of Tulu Kapi DFS revision, re-activation of Mining Lease application, in-principle approval with principal project financiers and exploration results demonstrating growth potential in Ethiopia and Saudi Arabia
EMERGING GOLD PRODUCER
IN THE ARABIAN-NUBIAN SHIELD

APPENDIX
Project History

- GPMC Ltd received Exploration Licence in 2005. Undertook detailed geological mapping, trenching and diamond drilling. GPMC then merged with Palladex to form Minerva Resources.
- In 2009, Dwyka Resources acquired Minerva Resources and changed its name to Nyota Minerals.
- Nyota work included a further 120,000m of drilling, which formed the basis of JORC compliant Indicated and Inferred Resource estimate of 25Mt at 2.34g/t Au (1.98Moz) including a Probable Reserve of 17Mt at 1.82g/t Au (1.0Moz Au).
- In Dec 2012, Nyota produced a DFS that generated an NPV of $69m an IRR of 11%, using $1,500 gold price and a 5% pre-tax discount rate with $289m capex.
- Under Nyota, Tulu Kapi has undergone an aggregate expenditure of over $50M.
- Falling gold price in 2013 rendered the project uneconomic under Nyota’s development strategy.
- KEFI has enlarged the indicated resource and triggered a revised DFS on a lower-risk/higher return basis.
Harry Anagnostaras-Adams  
*Chairman*

Founder or co-founder Citicorp Capital Investors Australia, Pilatus Capital, Australian Gold Council, EMED Mining and KEFI Minerals. Chairman Semarang Enterprises. Has overseen a number of start-ups.

Jeff Rayner  
*Managing Director*

BSc (Hons) Geology. Over 27 years experience; BHP Gold, Newcrest Mining in Australia and Indonesia; Chief Geologist Gold Mines Sardinia, VPE Medoro Resources and EM Central Europe EMED Mining.

Ian Plimer  
*Deputy Chairman*

Numerous geology Professorships including Newcastle, Melbourne, Munich and Adelaide Universities. Past and present Directorships include Ivanhoe Australia, Lakes Oil, Sun Resources, CBH Resources, Silver City Minerals, Niuminco and various Hancock Prospecting Pty Ltd entities. Much of career in industry.

John Leach  
*Finance Director*

BA(Econ.), MBA, MICA (Aust & Canada). Over 25 years’ in senior positions within the mining industry. Exec. Director EMED Mining, Former Directorships with Resource Mining Corporation Limited and Gympie Gold Limited.
EXPERIENCED DEVELOPMENT TEAM

Fabio Granitzio  
*Exploration Manager*  
Geologist (PhD, Cagliari, Italy). Track record of gold discoveries in Sardinia and Saudi Arabia. Over 15 years experience in the Americas (Escondida), Europe, North Africa and Mid East.

Simon Cleghorn  
*Resources Manager*  

Sergio di Giovanni  
*Metallurgist & Dev. Manager KSA*  
(BSc. Murdoch, Perth, MAUSIMM). Over 22 years experience in operations in Australia, Asia, Europe, Mid-East and Americas. He has expertise in CIL, heap leach and flotation plants for gold, base metals & iron ore mines.

Patrick Gorman  
*Development Advisor & Consultant Mining Engineer*  
(BSc (Hons.) Mining, Imperial College UK, MSc Mining, Colorado School of Mines) A Chartered Engineer (UK) with 35 years of international technical and project experience.

Kebede Belete  
*Country Manager Ethiopia*  
Geologist (PhD, Austria; MPhil, UK; BSc, Ethiopia). Over 25 years of experience working in exploration projects as Exploration Manager and Country Manager for Ethiopian Ministry of Mines, Golden Prospect Mining Company LTD (UK), Minerva Resources LTD (UK) and Nyota Minerals LTD (UK).

Tadesse Worku  
*Chief Geologist*  
(BSc, AAU., Ethiopia, Msc IIT-KGP, India): Over 20 years as exploration geologist and exploration leader in national, multinational and international projects for gold and base metals in the ANS of Ethiopia. Responsible for discovery & development of Tulu Kapi and all other prospects of KEFI/Nyota JV in Ethiopia, since 2005.

Abera Fantaye  
*Database & GIS Manager*  
Geologist (BSc., AAU), Remote Sensing and GIS (MSc., AAU). 30 years experience in mineral exploration and as GIS and database expert (17 years in government & 13 years in private sector).
