EMERGING GOLD PRODUCER IN THE ARABIAN-NUBIAN SHIELD

PRESENTATION TO CAPITAL MARKETS AT CAPE TOWN, SOUTH AFRICA FEBRUARY 2015
Harry Anagnostaras-Adams, Executive Chairman
Jeff Rayner, Exploration Director
The information contained in this confidential document ("Presentation") has been prepared by KEFI Minerals plc (the "Company"). While the information contained herein has been prepared in good faith, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers give, have given or have authority to give, any representations or warranties (express or implied) as to, or in relation to, the accuracy, reliability or completeness of the information in this Presentation, or any revision thereof, or of any other written or oral information made or to be made available to any interested party or its advisers (all such information being referred to as "Information") and liability therefore is expressly disclaimed. Accordingly, neither the Company nor any of its shareholders, directors, officers, agents, employees or advisers take any responsibility for, or will accept any liability whether direct or indirect, express or implied, contractual, tortious, statutory or otherwise, in respect of, the accuracy or completeness of the Information or for any of the opinions contained herein or for any errors, omissions or misstatements or for any loss, howsoever arising, from the use of this Presentation.

This Presentation may contain forward-looking statements that involve substantial risks and uncertainties, and actual results and developments may differ materially from those expressed or implied by these statements. These forward-looking statements are statements regarding the Company's intentions, beliefs or current expectations concerning, among other things, the Company's results of operations, financial condition, prospects, growth, strategies and the industry in which the Company operates. By their nature, forward-looking statements involve risks and uncertainties because they relate to events and depend on circumstances that may or may not occur in the future. These forward-looking statements speak only as of the date of this Presentation and the Company does not undertake any obligation to publicly release any revisions to these forward-looking statements to reflect events or circumstances after the date of this Presentation.

This Presentation should not be considered as the giving of investment advice by the Company or any of its shareholders, directors, officers, agents, employees or advisers. Each party to whom this Presentation is made available must make its own independent assessment of the Company after making such investigations and taking such advice as may be deemed necessary.

Neither this Presentation nor any copy of it may be (a) taken or transmitted into Australia, Canada, Japan, the Republic of Ireland, the Republic of South Africa or the United States of America (each a "Restricted Territory"), their territories or possessions; (b) distributed to any U.S. person (as defined in Regulation S under the United States Securities Act of 1933 (as amended)) or (c) distributed to any individual outside a Restricted Territory who is a resident thereof in any such case for the purpose of offer for sale or solicitation or invitation to buy or subscribe any securities or in the context where its distribution may be construed as such offer, solicitation or invitation, in any such case except in compliance with any applicable exemption. The distribution of this document in or to persons subject to other jurisdictions may be restricted by law and persons into whose possession this document comes should inform themselves about, and observe, any such restrictions. Any failure to comply with these restrictions may constitute a violation of the laws of the relevant jurisdiction.
Tulu Kapi in Ethiopia
On track for development to commence 2015 leading to commissioning end 2016 for production in 2017
• Updated Indicated Resource: 1.6Moz (18.8Mt @ 2.7 g/t), vs previous owner’s 1.1Moz (14.5Mt @ 2.4 g/t)
• On schedule with licencing, DFS, community resettlement, mine contractors’ bids, due diligence 2nd-hand plants
• Initial capex being targeted at c. $100M, vs KEFI’s initial estimate $143M, vs $235M estimate of previous owner

Jibal Qutman in Saudi Arabia
• Metallurgical testing for heap leach whilst trenching and drilling for additional small pits

Exploration
Granted second major exploration licence in Saudi Arabia and continuing to explore other licences in Ethiopia
• Hawiah licence granted Q4-14 - trenching 5km-long gossan and geophysical survey of VMS target underneath
• Tulu Kapi - metallurgical testing for heap leach of planned low-grade stockpiles of +4M t @ 0.6g/t
• Tulu Kapi - mapping and reinterpretting mineralisation under the planned open pit and on adjacent licences

Corporate
New strategic investor co-investing alongside directors to raise £4.9m
• On schedule arrangements for 3rd cornerstone shareholder in Q1-15 and full development funding in H2-15
• Team being built for construction and operations
• Operator of projects in the highly prospective Arabian-Nubian Shield, Ethiopia and Saudi Arabia. Targeting production of +100Kozpa plus exploration of a large portfolio of brownfields and grass roots targets

• In Ethiopia: 95% of KEFI Minerals Ethiopia (KME) with Govt 5%
• In Saudi Arabia: 40% of Gold & Minerals (G&M), 60% Saudi partner who provides advantage for licencing, financing & operations

• In Ethiopia, Tulu Kapi (TK), on track for KEFI to be gold producer 2017:
  o KEFI bought TK in Dec 13 a 1M oz Reserve for $10/oz, (2Moz Resource)
  o Overhauled project, reducing unit costs, capex and community disruption
  o Permitting application submitted Oct 14 and on track for approval in Q1-15
  o Refining est. EBITDA ave. $40-45M pa for 11 years from 2017, at $1250/oz

• Experienced Board and management being expanded with progress
**Board of Directors**

**Harry Anagnostaras-Adams**  
*Executive Chairman*  
Founder or co-founder Citicorp Capital Investors Australia, Pilatus Capital, Australian Gold Council, EMED Mining and Kefi Minerals. Chairman Semarang Enterprises. Has overseen a number of mining start-ups.

**Jeff Rayner**  
*Director - Exploration*  
BSc (Hons) Geology. Over 27 years’ experience; BHP Gold, Newcrest Mining in Australia and Indonesia; Chief Geologist Gold Mines Sardinia, VPE Medoro Resources and EM Central Europe EMED Mining.

**Director - Operations**  
To be appointed H1-15

**Ian Plimer**  
*Deputy Chairman*  
Geology Professor in Newcastle, Melbourne, Munich and Adelaide Universities. Past and present Directorships include Ivanhoe Australia, Lakes Oil, Sun Resources, CBH Resources, Silver City Minerals, Niuminco and Hancock Prospecting Pty Ltd group entities. Much of career in industry.

**Norman Ling**  
*Director*  
British diplomat for over 30 years, ambassador for the last 10. Served in many countries in Middle East and Africa. Last post, before retirement, was Ambassador to Ethiopia, Djibouti and African Union. For 2 years has been actively involved with development of Ethiopian mining.

**John Leach**  
*Director*  
BA(Econ), MBA, MICA (Aust & Canada). Over 25 years’ in senior positions within the mining industry. Exec. CFO EMED Mining, Former Directorships with Resource Mining Corporation Limited and Gympie Gold Limited.

*Source: Various company announcements  
*Mkt Cap data as at 27 Jan 2015*
ASSETS IN THE ARABIAN-NUBIAN SHIELD

- IPO on AIM in Dec 06. Equity financings of c. $25M to test opportunities in Africa and Middle East
- Nearly 2,000Km2 exploration licences granted or under application in the Arabian-Nubian Shield as from 2008
- 1st prod’n to be in Ethiopia, Tulu Kapi, target ramp up production in 2017 for base case c.1Moz over 10-12 years

Tulu Kapi and exploration targets in Ethiopia
- One of Africa’s largest 100 gold deposits.
- When Tulu Kapi operating it would rank as one of the top 200 largest producers, per Global In Situ Resource.
- $50M historic expenditure. Now upgrading historic DFS on 2Moz Resource and 1Moz Reserve
- KEFI acquired Tulu Kapi for £6M (£4.5M for 75% Dec 13 + £1.5M for 25% Sep 14). $10 per Reserve oz
- 95% ownership provides KEFI with control of project development and funding flexibility
- All-in-Costs excluding initial capex c. $760/oz, well below global average $928/oz
- Resources (2Moz) and Reserves (1Moz) upgraded and signed-off by KEFI and Snowden in Oct 2014 (JORC 2012) and Indicated Resource upgraded again by KEFI and Snowden in January 2015. Will update Ore Reserve shortly

Jibal Qutman plus exploration targets in Saudi Arabia
- 2012 gold discovery at Jibal Qutman within 12 months of EL grant, with initial Resource 0.5Moz Au (JORC)
- 25 ELs are under application covering ≈1,400km² for a major regional exploration program, targeting to maximise self-funding by G&M from Jibal Qutman gold discovery
**ETHIOPIA: THRIVING ECONOMY**

**PRIORITISED MINING SECTOR**

- **Dynamic economy:** GDP grew by 8.5% over the past 5 years, and over 7.1% in 2013. Main economic partners: China, Germany, Saudi Arabia, USA, Belgium. Ethiopia’s land footprint is greater than Spain and France combined, population over 90M

- **Addis Ababa is the Diplomatic Hub for Africa:** HQ of African Union, 2nd only to New York for number of embassies, Africa’s leading airport hub and airline

- **Diverse mineral resource endowment:** Newmont and Gold Fields recently commenced Au exploration in Ethiopia. Tulu Kapi will be 1° internationally financed metal mine. Top priority.

- **Government actively boosting mining sector:** Income tax reduced; royalty on Au reduced; legislative security of tenure, exemption from customs duty and taxes on mining equipment, accelerated depreciation on pre-production cost and capex. Fast-tracked bureaucratic procedure

- **Gold is main mineral export:** Gold exports increased to $602M in 2013 from $5M in 2001

- **Lege Dembi - the largest Au mine in Ethiopia:** +100Koz pa production, Reserve 2Moz Au
Acquired 75% of Tulu Kapi and set out revised development strategy

Affirmed processing target to 1.2Moz of ore per annum

Provided update of planning parameters for revising DFS

Upgraded JORC Resource 1.9Moz Au

Completed acquisition of remaining 25% of Tulu Kapi

Independent verification all-in-cost, owner-mining

Revised indicative terms for project finance

Reactivated Mining Licence Appl’n, having overhauled the project

Increased life-of-mine production

Renewal of Exploration Licence

Independently reviewed mine plan and prod’n target 86Koz

Upgraded JORC-compliant total Indicated and Inferred Resource of 24.1 Mt at 2.64g/t Au for 2Moz Au

Renewal of Exploration Licence

TULU KAPI’S OVERHAUL IN 2014 SINCE ACQUISITION DEC 2013
MOST MINERALISATION IN INDICATED CATEGORY WITHIN OPEN PIT
• Geotechnical analysis is refining mine design to reduce waste mining
• Semi-selective mining of the orebody is:
  o Reducing pit size and mine dilution (processing of waste)
  o Increasing head grade from below 2g/t to above 2g/t
  o Reducing aggregate tonnes mined of both waste and ore
• Reducing original 2Mtpa throughput to ≈1.2Mtpa, is dropping capex from ≈$235M to below KEFI initial estimate $143M (all-new equipment and owner-mining). Target ≈$100M
• Updating DFS for bank review Q2-15. Published updated Indicated Resource Jan 2015 and will now refine mine plans and Ore Reserves. Processing and Environmental also being updated
• Maximising local content in procurement and manning adds more value and reduces costs
• Pre-KEFI lease area and site layout

• KEFI reduced the area and sculpted the layout to minimise haulage distances, environmental impact and community disruption
## Tulu Kapi: Economically Robust

</tbody>
</table>

(1) Independent reviews being updated as part of value-engineering and DFS
(2) This ignores potential heap leach of low-grade stockpile and mining of underground resources which remain open at depth
(3) Including initial capex, All-in-Costs is $898/oz for owner operated/new plant scenario and $869/oz for the contract mining/2nd hand plant scenario
H1-15:

- $5M from planned new cornerstone investor Goldfields Resources Fund as ordinary equity at share issue price 1.3-2.0p per share. This planned issue serves to finance activities until full development funding in place for major construction works as from Q4-15.
- This will complement existing cornerstone investors Odey and Standard Life, who have participated in equity placings at each stage
- The 3 cornerstones plus board aggregate to c. 35% of KEFI ownership

H2-15: $100M Senior Project Debt + $20M Subordinated Debt + Equity (at project or parent)
(Targeted $120M development capital is additional to c.$60M pre-development capital invested as equity)

Notes:

- Ethiopian Government become entitled to 5% free-carry on production start
- Commercial banks confirmed indicative terms for 8-year tenor with 2-year grace period. Potential to look at extended tenor with Development banks
Q1-15:
- Mining Licence
- Trigger First Phase of community resettlement

Q2-15:
- Project Finance Technical Audit, DFS sign-off and Project finance formal credit approval

Q4-15:
- Major works commence

Q4-16:
- Commissioning production
HIGH-GRADE BELOW TULU KAPI OPEN PIT FOR FUTURE UNDERGROUND DEVELOPMENT
• Saudi Arabia is largely unexplored with few companies exploring for gold. Government priority as long as local participation is significant

• G&M (KEFI 40%, ARTAR 60%) – Saudi partner, Abdul Rahman Saad Al Rashid & Sons (ARTAR) – a major local group providing administrative, logistical, financial support. Also 4% owner of KEFI.

• G&M has proprietary database for selective targeting in Arabian-Nubian Shield (historic workings, geology, geophysics, remote sensing, prospect geology, alteration and structure)

• Few western mining companies operating in the country; includes Barrick Gold, which operates Jabal Sayid Mine. Once in production, expected at 100-130M lbs pa production of Cu

• Exploration and development costs are low by industry standards. Saudi Industrial Development Fund provides loans for up to 75% of the capital cost of mine development at nominal interest
The EL was granted in July 2012 and is approx 99km² in area.

Rapidly discovered 0.63 Moz initial Resource in 2013.

Mineralisation identified in five areas: Main, South, West, 3K Hill, 4K Hill.

Hosted in the +300km north-south trending Nabitah-Tathlith fault zone. Drilling and trenching: 2 more prospects under evaluation in the Licence.
Development Studies on Jibal Qutman:

Focusing on open cut heap leach to lower capex, speed up the timetable, and allow more open pit discoveries to be added as a modular developments

- **Mining & Processing** – independently reviewed pit shell designs. Process flow diagrams and design criteria performed with in-house expertise
- **Engineering Design** – Completed plant layout, major equipment list and bill of quantities. Currently reviewing to reduce estimated capex
- **Environmental** – Independently reviewed environmental study
- **Hydrology** – Large diameter water well completed. Pumping test completed and hydrology report completed
- **Metallurgy** – New tests currently being performed will be sufficient to confirm heap leach plant design for PFS level study

**Exploration of the Jibal Qutman Set of Tenements**

- Drilling at Jibal Qutman and prospecting on adjacent areas
• Hawiah EL covering an area of 95km², granted in December 2014
• +5km-long gossan, mineralisation exposed at surface
• Hosted in +120km north-south Wadi Bidah VHMS Mineral district
• Shallow gold-bearing mineralisation + deep base metal bodies
• Q1-15:
  • First pass program: completed 53 trenches on gossan
  • Geophysics, targeting deep Copper-Zinc bodies
